AUTOMATED MANAGEMENT AND CONTROL

# GESMATIK CONTROL MODULE

## Control of Gesmatik Helix, Box and Cykla Machines

### GESMATIK ADVANTAGES

- ROBUST: Reliable, large capacity, modular system.
- CONFIGURABLE: User identification adapted to your company.
- SAVINGS IN SUPPLIES FOR YOUR COMPANY: Restricts access and limits consumption.
- SAVE ON PROCESSES: Manage automatic delivery.
- STOCK CONTROL: Avoid stock outs by sending alerts to warehouse or supplier.
- ONLINE: Access to products 24 hours a day, 365 days a year.
- EFFICIENCY: No more time wasted on work material management.

### CHARACTERISTICS

The GESMATIK intelligent control module can control up to 3 vending machines (HELIX) and/or smart locker modules (BOX) and/or return modules (CYKLA).

Initial configuration of the Control Module tailored to the needs of each company:

- Number of machines
- Types of dispensers (spindle, spirals, pushers) to be controlled by each machine depending on the items to be managed.
- Definition of parameters: out-of-stock alert thresholds by item, profiles, etc.

GESMATIK controls each delivery of article and manages the stocks of work materials: Personal Protective Equipment (PPE), tools, office supplies, etc ...

The module is connected by SIM card to the internet, for a complete control -in situ or through computer or smartphone- of the activity of the machines.

### BENEFITS FOR ALL DEPARTMENTS OF YOUR COMPANY

#### Workers / Users

Materials always available where they are needed.

- The user identifies himself in the control module -with his card or access code- and selects the product he needs.
- The machine dispenses the item.
- The customer picks up the products in the checkout drawer.

#### Management, Purchasing, Occupational Risks, Quality

Efficiency, savings, traceability, compliance with Occupational Risks Prevention Law.

GESMATIK software embedded in the control module allows to know when, who and which product supplied the machine, guaranteeing total traceability of the products supplied and processes.

- Advanced function: Collection of worker's signature, product delivery acknowledgment or proof of receipt.

#### Software Administrator

Modification of parameters and creation of Statistics and Reports from any computer. Integrable in the company's ERP.

The GESMATIK software administrator configures the authorizations to users and the limitations of units to be dispensed by articles and time periods: Registration, cancellation and modification of users, Profiles, User permissions (access to different types of products), Stock exhaustion thresholds.

#### Warehouse Manager / Industrial Supply

No more out-of-stocks

The supplier of warehouse keeper connects to the system and knows when it is necessary to recharge the machine. This saves the customer the ordering process.

- Advanced function: Virtual requests of items to warehouse or supplier.
